ABOUT US

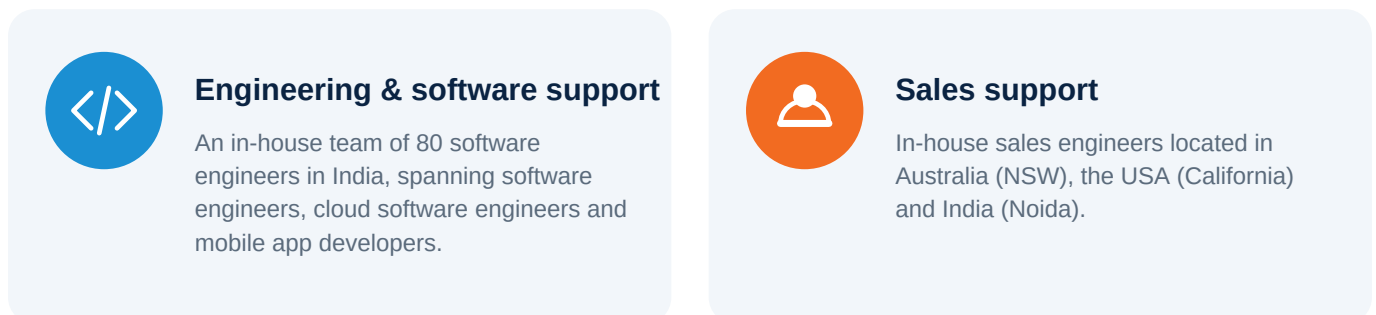

Your partner for Microsoft business solutions

SAN Dynamics is an authorised Microsoft partner that implements, licenses and supports Microsoft Dynamics business applications for organisations around the globe. Founded in 2017, we pair a dedicated engineering team in India with sales engineers in Australia and the USA.

Our people bring collective experience of more than 100 implementations across manufacturing, retail, logistics and service businesses, helping customers meet their ERP requirements with Microsoft technologies.

Where we work

Platforms we work with

What drives us

SOLUTIONS

Microsoft technology that runs your business

Dynamics 365 Business Central and NAV

Run the whole business on one connected system. Covers financial management, sales and marketing, purchasing, warehousing, manufacturing, projects, resource planning, service management and human resources. We implement, customise and upgrade NAV and Business Central.

Dynamics 365: ERP and CRM combined

A combined ERP and CRM built on a common data model. Manage financials, sales, marketing, operations, customer service, field service, project service automation, retail and talent from one connected platform.

Microsoft Azure

An ever-expanding set of cloud services to build, manage and deploy applications on a global network. We design SaaS and PaaS models with the scalability, security, hybrid capability and flexibility your organisation needs.

Jet Reports

Fast, accurate reporting that works the way spreadsheet users already do. Enrich Power BI with Jet Reports to get controlled, trusted data, see your business information quickly and add your own KPIs.

Mobile applications

Android and iOS app design and development, delivered together with web solutions, to put your business processes in the hands of your teams and your customers.

SERVICES

From first workshop to ongoing support

Dynamics implementation

End-to-end implementation of Dynamics NAV, 365 and Business Central, shaped around your processes.

Customisations

Tailored functionality and extensions built around the way your business actually works.

Version upgrades

Move to the latest Dynamics version, including NAV to Business Central, with a plan that limits disruption.

Third-party integration

Connect Dynamics with the other software your business relies on.

Azure SaaS and PaaS models

Cloud deployment and platform services on Microsoft Azure.

Mobile app development

Android and iOS apps, delivered together with web solutions.

EDI: Electronic Data Interchange

Automated data exchange with your suppliers, customers and trading partners.

Maintenance and support

Ongoing support with 24x7 cover based on your time zone.

How we deliver

Define scope

Agree objectives, requirements and project scope.

Development

Configure and build the solution.

Stabilisation

Test and refine before go-live.

Delivery

Hand the finished solution to your team.

Maintenance and support

Ongoing care after go-live.

CUSTOMER FEEDBACK

What our customers say

“

SAN Dynamics assisted us with the development of Navision for our customer service department. The team are quick and professional, I would highly recommend them.

SUPPLY CHAIN AND LOGISTICS COMPANY

“

We were able to improve efficiency by streamlining processes and by creating methods to measure metrics that we previously didn't have visibility to. SAN Dynamics team were very quick and professional, We would highly recommend them.

MANUFACTURING COMPANY

Customer references are available in relevant fields on request.
